Dear Tom:

In reply to your request for the locations of the Cheboygan Counties public warning systems for inclusion in the Cheboygan County Hazard Mitigation Plan, at this time the County does not have a functioning public warning system. The LEPC did discuss this situation at their April 11th meeting and the LEPC is aware that there is a need for a public warning system, but at this time no workable solution has been reached. The LEPC will notify you when they develop a working public warning system.

Sincerely,

John R. Wilcox
